

Dear Valued Client:

The Advanced Diagnostic Laboratories at National Jewish Health are pleased to announce that we have expanded our specimen storage stability criteria for the SC5b-9-Terminal Complex (test code: [SC5b-9](#)) and Bb Level (test code: [BBL](#)) tests. We can now accept samples for these tests that have been stored at -20°C for up to four weeks. This expanded stability is intended to make it easier to store and ship samples for these high-interest tests.

If you have any questions about the updates to these tests or any of our available test offerings, please contact our Client Services Team at 800.550.6227 or via email at ClinRefLabs@NJHealth.org.

Sincerely,

Steve Groshong, MD, PhD

Medical Director, Advanced Diagnostic Laboratories
